About Function –

Blood is the most essential thing for human life. It is an inhuman body fluid that delivers necessary substances such as nutrients and oxygen to the cells. Technically, blood is a transport liquid pumped by the heart (or an equivalent structure) to all parts of the body, after which it is returned to the heart to repeat the process. To donate blood or platelets, you must be in good general health, weigh at least 110 pounds, and be at least 16 years old. Parental consent is required for blood donation by 16-year-olds; 16-year-olds are NOT eligible to donate platelets.

An adequate amount of blood is needed in all health care facilities to meet the urgent need for patients facing trauma and other lifesaving procedures, such as blood transfusions – which saves millions of lives each year. Donating blood is a simple procedure that can be done within an hour. Safe blood saves lives. Blood is needed by women with complications during pregnancy and childbirth, children with severe anaemia, often resulting from malaria or malnutrition, accident victims and surgical and cancer patients

Vasantidevi Patil Institute of Pharmacy, Kodoli organized a blood donation camp under the National Service Scheme Department on the occasion of Azhadi ka Amrit mohastav Blood Donation Camp was inaugurated by Shri Yashwant Shikshan Prasarak Mandal Secretary Hon.
