### **Programme outcome:**

Alumni talk was inaugurated by dignitaries with welcome speech of Mrs. Anita A. Bandagar, Lecturer, VPIP Kodoli. Then As a Initial moment Dr. Santosh Payghan (Principal, VPIP, Kodoli) delivered Welcome speech and shared objectives of this alumni talk.

So Vasantidevi Patil institute of pharmacy arranged a Alumni talk on **Pharmaceutical Manufacturing and packaging** .This Guest lecture was conducted by **Prof. Rohan patil**

He talk about: Goal setting ,BMR and different departments in pharm Industry.

Pharmaceutical manufacturing is the process of industrial-scale synthesis of pharmaceutical drugs as part of the pharmaceutical industry. The process of drug manufacturing can be broken down into a series of unit operations, such as milling, granulation, compression coating.

A batch manufacturing record (BMR) is an important document for chemical and process manufacturers: It tells users how to produce a batch of a given product, then records the entire production process, from start to finish. Batch manufacturing record is a written document of the batch, prepared during pharmaceutical manufacturing process. It contains actual data and step by step process for manufacturing each batch. . Master formula record (MFR) is a master document for any pharmaceutical product. It contains all information about the manufacturing process for the product. MFR is prepared by the research and development team of the company and all other documents like BMR and BPR are prepared using MFR by the manufacturing units.A typical Pharmaceutical Industry has an average of 1200- 1300 SOPs. A Standard Operating Procedure (SOP) is a set of written instructions that document a routine or repetitive activity which is followed by employees in an organization.

Packaging must provide protection against climatic conditions biological, physical and chemical hazards and must be economical. The package must ensure adequate stability of the product throughout the shelf life.

Packaging is the science, art and technology of enclosing or protecting products for distribution, storage, sale, and use. Packaging also refers to the process of design, evaluation, and production of packages.

This was very informative session.

Lecture ended with Valedictory function and feedback from participants & Vote of thanks by Mrs. Anita.Bandgar, Lecture, VPIP Kodoli.

Alumni talk had brought together guests speaker and students from D.Pharmacy in Vasantidevi Patil Institute of Pharmacy, Kodoli to contribute their valuable outlook which was benefited to learn our students.
